

AI-Powered Venture Building

The full-stack studio for pre-seed founders

From raw idea to launched, investable product — strategy, design, development, brand, and marketing delivered by one team, powered by AI.

Investor Overview

March 2026

Dubai, UAE

— THE PROBLEM

Great ideas are failing for entirely preventable reasons

Pre-seed founders face an impossible choice: hire expensive agencies built for enterprise, or piece together freelancers and hope it all comes together.

01

Fragmented Execution

Strategy, design, and development handled by separate teams with no single owner. By launch, the vision is diluted — and founders only realise when it's live.

02

Enterprise Pricing

Traditional agencies charge enterprise rates with layers of overhead. A pre-seed founder burning runway can't afford 6-figure retainers for work that takes 6+ months.

03

Incomplete Launches

Products ship without user validation, acquisition strategy, or iteration plan. Functional — but fragile. In a crowded market, fragile doesn't survive long.

— THE MARKET

A massive, underserved founder market

The global startup ecosystem is booming — but the infrastructure to support early-stage founders has barely evolved. Most services are still designed for Series A+ companies with established teams.

\$500B+

Global VC funding
annually (2025)

90%

Of startups fail — most
due to execution, not ideas

305M

New businesses created
globally each year

72%

Of founders cite "building
the product" as #1 challenge

The MENA startup ecosystem alone raised \$3.4B in 2024, with the UAE as the dominant hub. Pre-seed founders in this region are actively seeking structured, affordable paths to market — and the supply side is severely lacking.

— OUR SOLUTION

One studio. Everything a founder needs.

Ventrify is an AI-powered venture studio that takes pre-seed founders from raw idea to a fully launched, investable digital product — in as little as 12 weeks.

AI-Augmented. Human-Led.

AI compresses time and cost — but every strategic decision is shaped and owned by experienced designers and engineers.

Speed Without Compromise

Our 5-phase methodology and AI tooling delivers in weeks what traditional agencies take months to produce — without cutting corners.

One Team. Every Layer.

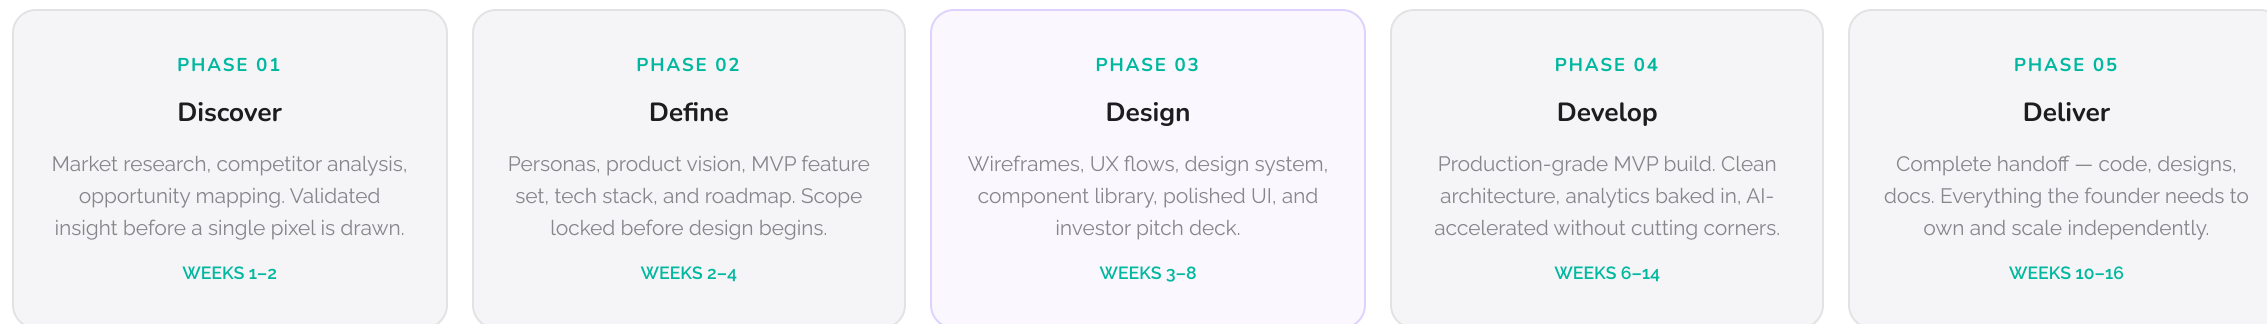

Strategy, design, development, brand, and marketing — all aligned from day one. No silos. No handoff gaps. No fragments.

"Enterprise-grade quality. Founder-friendly pricing. AI-powered speed."

— THE PROCESS

The 5-Phase Venture Build

A structured, repeatable methodology that transforms every engagement from chaos into a predictable delivery pipeline. Each phase flows into the next, handled by the same team, from the same brief.

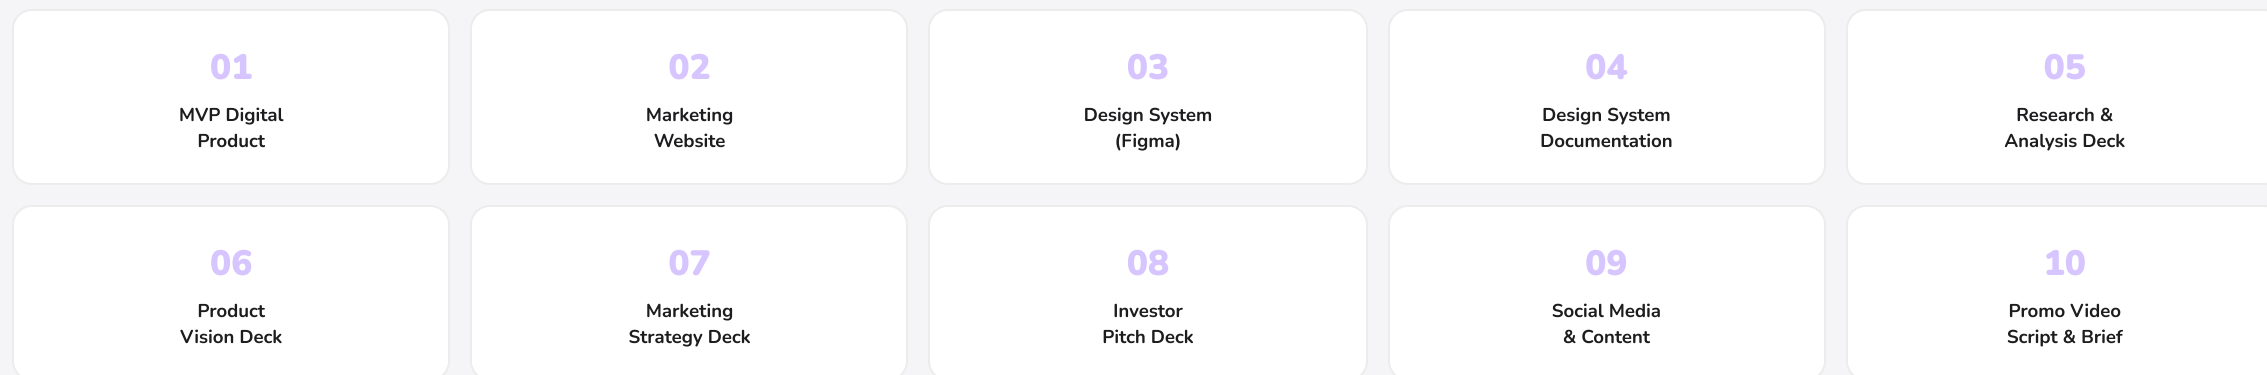

Formal gate reviews between phases ensure the client approves every decision before we proceed. Scope is locked at Gate 2 — no scope creep, no surprises.

— WHAT EVERY CLIENT GETS

10 standardised deliverables. Every engagement.

This isn't bespoke consulting — it's a productised, repeatable system. Every founder receives the same comprehensive package, tailored to their product.

Full IP transfer on completion. The founder owns everything — code, designs, brand, content. No lock-in, no dependency on Ventrify to operate what we built.

— THE AI ENGINE

AI isn't a feature. It's the production engine.

While competitors use AI as a marketing buzzword, we've rebuilt the entire production pipeline around it. AI handles the heavy lifting — humans make the decisions that matter.

What AI Does

- Builds the MVP product** — full-stack code generation
- Generates branded PDF decks** — research, vision, investor, marketing
- Creates design system plugins** — Figma tokens, components, documentation
- Writes marketing content** — blog posts, social media, SEO copy
- Automates publishing** — CMS integration, social scheduling
- Produces video scripts** — storyboard, voiceover, audio brief

What Humans Do

- Strategic decisions** — market positioning, product direction
- Visual design craft** — Figma wireframes, polished UI, brand identity
- Quality assurance** — code review, design review, QA testing
- Client relationships** — discovery calls, gate reviews, sign-offs
- Architecture decisions** — tech stack, scalability, security
- Video production** — filming, editing, post-production

Result: 3–4x faster delivery. 60–70% lower cost. No compromise on quality.

— THE COMPARISON

Traditional agency vs Ventrify

Dimension	Traditional Agency	Ventrify
Timeline	6–12 months typical	8–16 weeks end-to-end
Cost	\$100K–\$500K+ (fragmented vendors)	Fixed tiers from AED 150K (~\$41K)
Scope	Usually design OR dev, rarely both	Strategy + Design + Dev + Brand + Marketing
Deliverables	Varies per engagement, often vague	10 standardised deliverables, every time
Team	Multiple vendors, no single owner	One integrated team, one methodology
Ownership	Often retains IP or creates dependency	Full IP transfer. Zero lock-in.
Post-Launch	Project ends. "Good luck."	Optional content retainer for ongoing growth

— BUSINESS MODEL

Three tiers. Predictable revenue.

Productised pricing with milestone-based payments. Clients know exactly what they get and when they pay — no hourly billing, no scope ambiguity.

Launchpad

From AED 150,000

Strategy to delivered MVP. Everything to go from idea to product.

- ✓ 5-Phase Methodology
- ✓ Market Research & Strategy
- ✓ Full UX/UI Design & DS
- ✓ MVP Development
- ✓ Analytics Integration
- ✓ Figma Files & GitHub Repo

MOST POPULAR

Venture

From AED 240,000

Launchpad + brand identity, marketing website, investor deck, social & SEO.

- ✓ Everything in Launchpad
- ✓ Brand Identity System
- ✓ Marketing Website
- ✓ Investor Pitch Deck
- ✓ Social Media Strategy
- ✓ Launch Content & SEO

Venture Pro

From AED 330,000

The full package + video, growth content, and post-launch retainer.

- ✓ Everything in Venture
- ✓ Promo Video Production
- ✓ Ongoing SEO Content
- ✓ Content Calendar
- ✓ Post-Launch Retainer
- ✓ Priority Support

Payment: 40% upfront → 30% at design start → 30% on delivery

Add-ons: Brand, website, pitch deck, social, and SEO available standalone

— SCALABILITY

A repeatable engine that scales with demand

Because the methodology is productised and AI handles production, Ventrify can scale client volume without proportionally scaling headcount.

Project Revenue

AED 150K–330K per engagement

Milestone-based payments provide predictable cash flow. Average engagement: ~16 weeks. With AI efficiency, gross margins of 65–75% are achievable per project.

Retainer Revenue

AED 5K–13K/month per client

Post-launch content retainers (blog, social, email) create recurring monthly revenue. AI-generated content keeps production costs minimal while maintaining quality.

Add-On Revenue

AED 5K–22K per service

Standalone services (brand, website, pitch deck, social campaigns) available to existing products and teams. Lower touch, high margin.

3–4x

Faster than traditional
agency delivery

65–75%

Target gross margins
per engagement

~2x

Client capacity vs
traditional model

Low

Headcount dependency
AI handles production

— WHY NOW

The AI inflection point changes everything

For the first time in history, a small team with the right AI tooling can deliver output that previously required a 30-person agency. The window to build the definitive AI-powered venture studio is open now.

01

AI Has Matured

Code generation, content creation, and design tooling have reached production-grade quality. This wasn't possible 18 months ago.

02

Founders Need Speed

The startup ecosystem moves faster than ever. Founders who launch in 12 weeks have a massive advantage over those who wait 12 months.

03

MENA is Surging

Dubai is the fastest-growing startup hub in the region. Government-backed programmes are creating thousands of new founders who need exactly this service.

"The agencies that don't adopt AI will be outpaced. The AI tools that don't have human craft will be commoditised. Ventrify sits at the intersection."

Let's build the future of venture building — together.

We're looking for partners who believe that AI + human craft is the new model for building products — and that the best time to build it is right now.
